

QUICK GUIDE TO LANYARDS

How to work out what lanyard you need!

Print

Sublimated Lanyards are a smooth ribbon & full colour which allows for complex graphics. You can PMS match all aspects of sublimated lanyards.

Screen-printed Lanyards are ribbed fabric & allow for 1-3 colour logos only. We have a range of stock colour lanyard ribbon including rainbow. You can PMS match your lanyard colour with a dye charge.

Width

Lanyard widths are 15mm, 20mm & 25mm

Fabric

Sublimated lanyards are available in 100% polyester & rPET fabric

New to our full-colour range are our 100% **biodegradable paper lanyards**

Screen-printed lanyards are polyester, rPET and Bamboo

Budget v's Premium

Our Screen Printed Aquarius and Sublimated Pisces Lanyards printed off-shore are available in 'Budget and Premium' So what the difference?

Budget

The most economical pricing without the fills!

Budget Lanyards are made of the same quality fabric and print. There is no difference in premium. However, the attachments are slightly less shiny in appearance and lanyards are BULK packed. Budget Lanyards also have a longer lead time so you need to allow an extra week for the delivery

Premium

Our most popular lanyard provides high quality and fast turn-around time. RUSH Service available.

Attachments are shiny.

Lanyards come attached to our tangle-free cards making it easy to distribute and keep tidy.

Tangle Free Card

QUICK GUIDE TO LANYARDS

Attachments

Lanyards can have single or double attachments. Before ordering, make sure you check what is being attached to the lanyard. Our most common attachments are Carabiner or Alligator Clip. Do you need a safety breakaway? These can be at the back of the neck or side!

IMPORTANT NOTE:

Off-shore lanyards will always be **STITCHED**

Taurus lanyards will be **CRIMPED or SEALED** - you can request your preference if you have one

Lanyards with Quick-Release & Reels will be **SEALED** as standard.

Breakaways on 25mm wide lanyards will be **SEALED**.

What is SEALED?

High-frequency vibrations to generate friction and heat, causing the fabric to melt and fuse together, creating a strong, sealed seam without the need for traditional sewing.

SEALED

CRIMPED

STITCHED

Which one?

Quick Release Clip or Buckle are often used when items like keys are stored on a lanyard and need to be removed from the main section of the lanyard. They are similar to the clips you find on backpack straps.

Safety Breakaways function as a safety release to prevent the lanyard from being caught around a person's neck.
